

## *A Brief Biography:*

Dr. Marc M. Gottlieb was born and raised on Long Island, attended Union College in Schenectady New York and then shuffled off to Buffalo for Dental School. While at the University of Buffalo he received many academic scholarships, awards and fellowships.

After graduation from dental school Dr. Gottlieb went on to a two-year post-graduate residency program at Long Island Jewish Medical Center This unique opportunity provided advanced training in anesthesiology and all the specialties of dentistry.

Dr. Gottlieb is currently on staff at Stony Brook University Hospital and maintains a full time private practice. For the past three years made Dentistry Today's list of top CE providers.

*Jewels you can use on Monday:* A colleague once told me the difference between a good dentist and a great dentist is a minute along with a few hours of good continuing education. Jewels you can use on Monday is a series of clinical techniques, used by key opinion leaders in dentistry, to streamline and make your practice more productive. This program is designed for everyone from the dental student to the veteran practitioner about to retire.

I will demonstrate how to incorporate Evidence Based Dentistry (EBD) into your practice, restore the difficult class II posterior composite, obtain perfect impressions, and simplify the porcelain fused to metal crown repair process. You will learn how to restore the tooth with a large open box or missing cusp back to proper form and function. You will see there are no excuses for a less than perfect impression. Learn how to manage bleeding and saliva. We will cover all available digital systems as well as troubleshoot the common techniques used for fixed and removable partial dentures as well as explore your options for border molding without compound.

Upon completion of this course you will have a better understanding of what techniques and materials you can seamlessly incorporate into your practice. I will give you systems that allow you to work faster and more efficiently saving you thousands of dollars per year.

---

### Objectives:

- Exposure to Evidence Based Dentistry
- To learn one or more new procedures you can use on Monday.
- Understand how to use the ABC Wedge System and other techniques to restore the large posterior composite restoration.
- Incorporate Tribochemical treatment of metals and zirconia into your bonding technique.
- Determine the differences between the four major digital impression systems.
